Comments:

What do you expect from the Governor and democrat legislatures, who are looking to win votes in the next election. They and the Cabinet Secretaries who feel they are superior to the electorate. Maybe EV is find in cities but what of those individuals who live in rural areas. What are you going to do when the vehicle runs out of power and blocks traffic at rush hour or emergency situations? What about parking garages, can they stand the addition weight? If there is a accident and the battery is damage beyond repair, do you have a location establish to dispose of them and will be the cost? By past example as with tires you are going to charge the consumer a fee to dispose of them. Plus, you are using my tax dollars fund EV station that you never did for a gas station. Where as the Funds could be better used in the local school system which are every falling short in STEM!
