January 3, 2020

Greetings,

You are receiving this letter because we believe you may use a device for solvent cleaning. The Delaware Department of Natural Resources and Environmental Control (DNREC) is in the process of updating its regulations related to solvent cleaning, specifically cold cleaning (these updates do not substantially impact vapor cleaning). The Department will be holding two public workshops in late January to discuss draft changes to Section 33.0 “Solvent Cleaning and Drying” of Delaware air regulation 7 DE Admin. Code 1124 Control of Volatile Organic Compound Emissions¹:

Two workshops will be held at two locations, and the public can participate in either location:

- **Tuesday, January 28, 2020 beginning at 1:30 PM** in the DNREC conference room, located at 391 Lukens Drive in Riveredge Industrial Park, New Castle, DE.
- **Thursday, January 30, 2020 beginning at 6:00 PM** in the Richardson and Robbins Building Auditorium, 89 Kings Highway, Dover, DE.

The U. S. Environmental Protection Agency has designated certain areas of Delaware in non-attainment of the federal standard for ground-level ozone. Ground-level ozone is formed through the reaction of VOC and other compounds in the air in the presence of sunlight. High levels of ground-level ozone can cause or worsen difficulty in breathing, asthma and other serious respiratory problems. These amendments will reduce the volatile organic compound (VOC) content of the solvent used, thus reducing emissions of VOC.

The amendments are related to cold cleaning machines and the draft changes include: (1) eliminating the exemption for cold cleaning machines containing less than one liter of solvent, (2) allowing cold cleaning machines to be heated to below boiling, (3) reducing the solvent VOC concentration from 100% to 25 grams VOC per liter of non-VOC solution for most applications and (4) allowing higher VOC concentrations to be used in conjunction with a Department approved VOC capture and control device.

¹ The purpose of the changes is to incorporate portions of the Ozone Transport Commission “Model Rule for Solvent Degreasing 2012” and the California South Coast Air Quality Management District rule 1122 for “Solvent Degreasers”.

The draft regulatory language will be made available for public review at the Department's offices at 715 Grantham Lane, New Castle, DE and 100 West Water Street, Suite 6A, Dover, DE. The draft language and other documents of interest will also be available for review on the Department's website at <https://dnrec.alpha.delaware.gov/air/permitting/under-development>. Please contact (302) 739-9402 to make an appointment to inspect the draft regulation.

Statements and testimony may be presented either orally or in writing at the public workshops. If you cannot attend or wish to submit your comments in advance of the public workshops, please submit comments in writing to renae.held@delaware.gov or via USPS to the Division of Air Quality, 100 West Water Street, Suite 6A, Dover, DE 19904. The Department will accept written comments postmarked (or emailed) no later than Thursday, February 14, 2020, unless a longer comment period is designated by the DNREC staff at the public workshops.

If you have a DNREC issued permit for a cold cleaning machine, you may call your assigned Division of Air Quality permit engineer contact for more information.

If you have any questions, please contact me at (302) 739-9402 or renae.held@delaware.gov.

Sincerely,

A handwritten signature in blue ink, appearing to read "Renae J. Held".

Renae Held
