DNREC's Division of Air Quality and Tank Management Section to hold public workshops April 16 on gasoline vapor controls at gas stations and proposed Underground Storage Tank regulations

DOVER (March 18, 2019) – The Department of Natural Resources and Environmental Control's Division of Air Quality (DAQ) and the Tank Management Section (TMS) within DNREC's Division of Waste & Hazardous Substances will hold two public workshops next month on proposed changes to vapor emission recovery systems and controls at gasoline dispensing facilities (GDFs) and on changes to Delaware's Underground Storage Tank (UST) Regulations as required by new federal UST regulations.

Both workshops will be held on Tuesday, April 16, with one upstate and one downstate, as follows:

- **New Castle County:** 10 a.m., at DNREC's Lukens Drive field office, 391 Lukens Drive, New Castle, DE 19720; and
- **Kent and Sussex Counties:** 6:30 p.m., at DNREC Auditorium, Richardson & Robbins Building, 89 Kings Highway, Dover, DE 19901.

At the workshops, staff from the Division of Air Quality and the Tank Management Section will discuss proposed regulatory changes to:

- Phase out Stage II vapor recovery systems at Delaware gasoline dispensing facilities;
- Establish effective controls on vapor emission from GDFs' USTs and ensure the USTs remain vapor tight once Stage II systems are removed; and
- Review changes required due to promulgation of new federal UST regulations.

For more information on the workshops, please visit the Delaware Public Meeting Calendar at <https://publicmeetings.delaware.gov/Meeting/62548> and <https://publicmeetings.delaware.gov/Meeting/62549>

Additionally, you may contact Frank Gao Frank.Gao@delaware.gov in the Division of Air Quality and/or Eileen.Butler@delaware.gov in the Division of Waste & Hazardous Substances' Tank Management Section.
