Subject: RE: Atplus Destiny Croda, Inc. Drumming Tank project

The Atplus Destiny is a blend made by physical mixing. I looked at the components to determine which ones are volatile and used the composition to estimate.

The components are

- Tween 85LM, 30.1%
- Span 80, 15.1%
- Propylene Glycol, 10%
- G-3865 INT, 5%
- Atlox DP 13/6, 15.1%
- C9-C11 APG, 23.9%
- Monoethanolamine (MEA), 0.9%

Let me know if you need anything else.

Gwen

Subject: Atplus Destiny Croda, Inc. Drumming Tank project

Gwen,

The Department is questioning the Atplus Destiny tank (less than 0.2 lbs/day) exemption from permitting. We don't know how you determined emissions. There is an exemption for stationary tanks if the vapor pressure is known.

21.0 Any stationary storage tank not subject to control by the provisions of this regulation, which contains any liquid having a true vapor pressure less than 0.5 psia at 70F or is less than 5000 gallons capacity.

Please confirm the permit exemption.
