Comments on Docket #2020-P-A-0018

Name: Patrick R McGown
Phone: 3028587500
Email Address: patrick.r.mcgown@gmail.com
Organization: no

Comments:

Having looked into Croda's history and given its closeness to both residential areas and a major public bridge I must conclude that the permit submitted does not address my safety concerns on the release of pollutants direct to air or explosive hazards of EO production. I would like to see what safety precautions Croda will implement on the drumming tank beyond a simple conservation valve and clarification on if the Drumming tank is a Blending tank and if it will be used simply to distribute EO or help in its production. Until these and the concerns of New Castle County and it's residents are addressed I must insist the permit be denied especially given the short duration between restart of production after the last spill and increasing the output of both products and toxins into the atmosphere.
