Comments:

This proposal needs to be stopped. United Emirates based Gulftainer through their subsidiary GT USA Wilmington LLC, is a major threat to national security. GULFTAINERS Iraqi-born principals Hamid Dhia Jafar and Dr. Jafar Dhia Jafar have for decades been involved in financing, design, construction, storage, transportation, concealment, and proliferation of nuclear, chemical, and biological weapons of mass destruction (WMD). Some of those WMD's have already hurt American troops and killed many innocent civilians. As of 2010, GULFTAINER gained access to an advanced delivery system for those WMD's when GULFTAINER entered into a half billion dollar joint venture with Russian state-owned weapons conglomerate ROSTEC / ROSOBORONEXPORT that exports Club-K container Missile Launching system. the GULFTAINER-ROSTEC joint venture is called GULFTAINER RUSSIAN TECHNOLOGIES. THIS IS SERIOUS. This means they could bring in missile launchers inside a container and activate it remotely. The Delaware Department of Natural Resources and Environmental Control tasked with protecting the health and safety of Delawarians, has a moral and legal obligation to protect the citizens of Delaware and the United States from GULFTAINER and its parent organization THE CRESCENT GROUP OF COMPANIES. The CRESCENT GROUP'S PRINCIPALS who reside in the UAE are actively working with America's adversaries Iran, China and Russia. I am forwarding this to President Trump as well. Please stop this.
