Organization: No

Comments:

My cousin is a retired US Army Intel officer who spent the last decade teaching in China. He has warned me how the "supposed" Chinese public companies are controlled either directly or indirectly by the Chinese Communist Party. The Chinese have made control of the worlds shipping and waterways a major part of their plan to protect financial and military power around the world. They are doing this directly with illegal military intervention in the South China Sea and less conspicuously in places like the Bahamas, South America and the Middle East with similar shipping facilities. I urge you DO NOT ALLOW the Chinese Communist Party to create a foothold this close to Washington DC! Any economic benefits realized from this project will be short lived and potentially paid for by the loss of America security and freedom!
