Comments:

Im concerned with the Gulftainer container company coming into your port ,due to the ties of some of the company business dealings with terrorist sponsored countries. I live near Port Canaveral fl this was a huge concern to the residents at our port with this company. We currently have a nuclear sub base besides naval base and Kennedy space center all within the port . A few years back we had a Russian sub 65 miles off Jacksonville fl naval port . We cannot trust a country that dosent follow the same US Customs rules of container inspections , its to late to inspect when its in the port docked. Thank You
