Comments:

RE: Diamond State Port Corp.'s Proposed Container Port I am a born and raised Delawarean that believe that you can both preserve / improve our environment and provide opportunities for growth in our economy. I think this project does just that. I am a part of the silent majority that approves of this project and encourages you to move forward with it. This new Diamond State Port Corp.'s container port is the type of project that the "Department of Natural Resources and Environmental Control" should be supporting along the Delaware river. As long as the there is no storage tanks for Oil or Gas or raw minerals that could contaminate the river, I believe this project should be approved to move forward.
