Organization: no

Comments:

Is there a DelDOT traffic study? Are the current upgrades to I-95 Exit 9 in anticipation of increased traffic due to the proposed port? Presumably truck traffic in and out of the port would use I-495, but is there anything to keep truck traffic off residential roads--Edgemoor and Marsh Roads. Where will trucks go when I-495 is closed or has traffic jams? What is anticipated increase in truck traffic on 202 and 141? Does this project enhance access to the state park by foot, bicycle or car? Is access to be interrupted during construction? Is there some sort of security concern that could restrict access to the park? Does IKO continue to operate?
