Comments:

I have recently purchased the home at 30347 Terrace Road, which is located across the canal and two properties up from the area that is being discussed. I am in full support for the dredging of the canal sited in this request. At low tide, the canal is extremely low and would be dangerous for anyone trying to navigate the canal in a boat. I feel the marine life is also suffering because of the low conditions in the canal and dredging would enhance the marine life in this area. Mr. Bolduc has seemed to research the necessary steps needed for the safety of the environment and surrounding neighbors' properties, and would recommend that he be given permission to dredge the canal in front of his property. Thank you for your consideration. Terri Lokey
