**Subject:** Cobia size and creel

I agree with option 2. As a cobia fisherman in delaware it's a great idea to have a 3 fish limit per boat as a recreational option. We have had great years of cobia action these last 3 years and itll help the catch and release side on the smaller fish.

Hi:

Please accept this comment as support for Cobia option 1. Thanks!

### Comments:

I am in support of option 2 (1 per angle, 3 per boat). 1 fish per trip shouldn't be an option. These fish get big and 40" is consistent with neighboring states. It seems more and more fish are seen and caught each year, and more people are looking to target cobia. A 1 fish per boat wouldn't be worth a trip and would wipe out any rec guys going out trying to actually target cobia.

**Comments:**

I would rather it be option 2, the ability to catch one cobia per person and 3 per vessel at 40" or greater. I don't think it would be worth getting all the gear together to fish them to only catch one fish per boat, especially when there is usually 3-4 people per boat.

**Comments:**

Please choose option 1. Cobia rarely come into DE water but when they do it would be a shame to have to release a 32 - 39 inch fish or any fish caught before June.
