To Whom It May Concern,

I am writing this letter in regards to the Lawton family marina. I have lived out here since I was 5 years old with my family and in turn have built my home and reside on the family land for the last 47 years. My family that consists of 3 children and 5 grandchildren spend a lot of time on the water. Due to very shallow water, it makes it very difficult to put our boats over. Therefore, a dock would make it much easier. There will not be any additional boat traffic as it only pertains to family and will have minimal impact on the environment.

I don't feel that we are asking above and beyond anyone else as most houses going up and down Herring Creek have a dock not to mention that many of those docks are 100 feet. I firmly believe that it is within our rights to obtain a dock as well.

Thank you for your consideration.

Joe and Mindy Ribinsky III
