RE: Proposed Eisenmann Pier Extension and Revision Docket #2021-P-W-0006

Dear Ms. Bobola:

Thank you once again for your efforts to keep the Villages at Herring Creek HOA(VHCHOA), a 141-home community, informed of the activities surrounding the proposed Eisenmann pier extension. Your ongoing support is very much appreciated.

We have reread both the original and the revised application. After a review of the case law applied by DNREC to revise the property line drawing, it remains unclear as to why Dr. Maurmeyer did not use this same methodology in the original application. The revised application which uses the redrawn lines appear to show the entire proposed Eisenman pier extension to fall within the VHCHOA property.

As previously stated, the VHCHOA maintains its objection to the proposed Eisenmann dock extension as the proposed designs negatively impacts the HOA's ability to construct its own pier from the common grounds(parcel: 234-18.00-23.02).

Sincerely,

Eileen Hagerty, Gary Desch, Anne Lara

VHCHOA Board
