Comments:

Please deny Mr. Singer's application to build a new dock, pier and gangway. His proposal is located on the narrowest part of Lake Comegys and it extends 21' into the lake. It will reach very close to the neighbors on the lake across from his house. It will be so close it is almost as if a bridge across the lake is being allowed. He has plenty of land to launch canoes and kayaks right from his land portion onto the water. Why does he need a dock? The construction will disturb the homes of many turtles and other wildlife that enjoy Lake Comegys. Approval for this structure will mean another home on the lake will request to build something even larger. And where will it end. Lake Comegys is tiny. Whatever is approved on Lake Comegys could be translated into bigger structures on Silver Lake too. The drawing he submitted does not provide any information. The drawing should include Lake Comegys, the new structure and the house - all in SCALE to show the exact location of the structure to the lake, the house and the houses across from the Singer Property. His drawing is just shows the dock, pier, etc floating in space. We live on Lake Comegys at 38460 Cottage Lane , #10, 19971. Please look into this proposal. We understand that your office is busy and that you probably receive many requests for changes. We would appreciate your help and professional knowledge looking into this matter. Thank you so much for your time. Linda and Maurice Offit
