Comments:

Docket #2021-P-W-0012 Norman Singer application In review of the information I have read regarding this project, I have some concerns. The drawing for the project is incomplete. It is lacking information regarding the position of the dock in relationship to water depth, wetlands, proximity to other properties, or the percentage of dock length compared to lake width. The missing information is very important and without it, the application should be denied. The 5' width of the dock exceeds the 4' normally approved by WSLS. It is also much longer than is necessary for the purpose of canoe launching and appears to exceed the 10% allowable length for the body of water. These two factors would result in unnecessary encroachment on to public lands for private purposes. The lake is not large, if this project were approved, other property owners are likely to follow suit, interrupting the patterns of wildlife and marring its' natural appearance. I respectfully ask that the Singer application be denied as it does not meet requirements set by WSLS and would be counter to the protection of natural public lands. Sincerely, Lisa Ginder 38470 Cottage Lane #20 Rehoboth Beach
