Written Public Comments DNREC Renewal GP for Poultry.pdf;

We are submitting comments for the permit renewal, General Permit DE 5000N/11. Comment period was extended until July 15th. We have had operational facilities with complaints received and no action on facilities without permits. NOI have been filed for years with no AWMP, Public notice or permitting. Neighbors are being impacted, going through the proper channels to rectify the problems. The problems are not rectified, the facilities are still operational, fully stocked with poultry and operating without permits, clearly in violation of federal and state law. There is no transparency and no violations are being issued, We are submitting comments attached for the record.

Thank you,

Joseph Meyer, authorized representative
Sussex Health and Environmental Network
