Comments:

In examining the dimensions for the dock requested in Docket #2021-P-W-0016, I came across a few concerns. 1. In an area that is designated as protected wetlands, it seems that the a dock intended to repair the existing structure is being proposed, However, a fixed pier, a floating dock, a wetland walkway, a gangway, and a floating platform, and a floating jet ski platform are all being requested as well. 2. It appears that this request calls for a substantial increase in what is currently present. 3. In a protected environment, I question the intended use, and the scope of the dimensions. I do want our neighbors to enjoy the natural beauty of the environment of their home and encourage water activity, however, I question the need and wisdom to add structures with such oversized dimensions to this small cove. Additionally, nearby communities share much smaller structures, in accordance with regulations. If some can expand, all should be permitted to do so, otherwise, we should all keep these wetlands as protected.
