My comments are as follows:

See Attached.

We absolutely do not see the need for the huge pier and dock expansion request put forth by the homeowners at 23854 Brant Circle, Lewes, De. The current dock/pier system already expansions well into the wetlands of Herring Reach. The expansion of the current pier plus the addition of a 6 ft by 6 ft floating platform, 6 ft by 40 ft floating dock, 6 ft by 10 ft floating jet ski platform is excessive for the area and will disrupt and invade the natural habitat of the blue herons, green herons, egrets, fish, crabs, turtles, , frogs, etc. We need to preserve and protect the sensitive wetlands area surrounding the proposed expanded pier and dock site and not authorize this expansion to allow large boats and numerous jet skis into a natural habitat.

It is our understanding that DNREC is required to notify all property owners within 1,000 feet of the requested expansion. We also want to point out that a number of homeowners surrounding this area have not received or have not been sent the notification which should make this public notice invalid.
