I've been following the Sussex County BIOgas proposal for some time now, trying to understand the pros and cons. Today I read Mrs. Akhter's letter in the Cape Gazette, and it helped crystallize my thinking. Why is government taking care of a problem that is not being dealt with by the chicken industry, and why is it allowing trucks from out of state to bring waste into my county - if this biogas facility is approved.

Why should western Sussex become the toilet of DelMarva? What are the other solutions? Who has/is looking into them?

I cannot attend the hearing on 10/26, but I want to make my views known.

Thank you for the opportunity,

Carol Conroy
