Comments:

I am a resident of Indian Summer Village located in Sussex County, Delaware. I had to install a custom water filtration system in my home at my expense when I bought it in 2019 because the water in this area is filled with contaminants. And now, we have discovered that the local wastewater facilities are outdated, have failed, and are illegally spraying pollutants into the air and onto fields in this area that eventually contaminate our well water and without any regard to public health. We need these facilities to be replaced with modern equipment and processes so the health of the public isn't placed in danger. This situation is inexcusable! No more coverup...the crimes have been exposed and the criminals should and will be held accountable to the fullest extent of the law.
