Subject: Fwd: Mountaire 2 of 2
Attachments: Parcel Index.xlsx

This email was sent the same day I spoke with Mr Rogers. Clearly we spoke about far more than "some sort of a pread hearing"

Mark and Rick,

I attached an updated copy of the Excel spreadsheet I'm using to categorize things.

I spoke to more people in the community who have the same kinds of illnesses. There is a pattern of vertigo, digestive issues, gall/kidney/tonsil stones, skin conditions, and cancer.

This link contains recent photos and videos I took. [redacted] (you'll see [redacted] name come up again) got a video of one of the trucks leaving the dump [redacted]

<https://share.icloud.com/photos/0yT5UAljxmQGqbj8m29t2NDVQ>

What you see in those images are the well heads I could get to, an aerial view of the center of the treatment facility, pictures of the piles of dirt the placed on top, and a video of the large pond they created. I pulled a FOIA request a couple of days ago to get all well readings from the Inland Bays water treatment facility since 2015.

The other photos and video of the channel cut through the dirt pile are taken from the parcel where the satellite images shows the dumping in action. There is a straight up illegal landfill there since that satellite image was taken.

Again, I think it would be helpful if I could step you through the slides so I can provide details and answer questions about each.

In the event you forward this to a team to investigate criminal activity, I have witnesses I believe they should speak to who can provide testimony regarding illegal activity in the "clean up" department, who may have orchestrated the illegal dumping and a person who can corroborate why that person was fired, one who can testify that Mountaire wasn't spraying the fields but was injecting directly into the ground with something called an articulating machine, three who can testify to the unsanitary conditions within the plant, and someone who can testify to the fact that they only clean up when they know an inspection is happening as well as working conditions during COVID outbreaks in which they were "packed in like animals".

[redacted]

Good morning,

Thank you for the additional file. I finally have time to review these today; likely this afternoon. Ex. 6 Personal Privacy (PP) III
focus on the materials you sent this afternoon.

Sincerely,

Rick

Rick Rogers, Chief

Water Branch (3ED30)

Enforcement and Compliance Assurance Division

U.S. EPA Region III

1650 Arch Street

Philadelphia, PA 19103

Rick,

I have more. I wanted to get these to you so you could see the scale that I'm talking about. If you are filing any of this away, please attach it to EPA case 1298294.

ED_006227_00000078-00002

I met another sick woman nearby where I live who has had three forms of cancer and also suffers from vertigo. She lost her bladder and a kidney and had numerous tumors. She is willing to speak to someone from the EPA if asked.

I also met a woman, who has offered to speak to the FDA, who worked at Mountaire's Millsboro plant for many years (I think she said either 16 or 18 years). She quit because she got COVID-19 and didn't want to get it again. She said the outbreaks there were big. She also said when the FDA would come to inspect everyone would clean up. Other than that it was a mess. I spoke to another person who would also likely be willing to come forward who said every day he would come home "smelling like ****". He only lasted two weeks. If Mountaire has active outbreaks of COVID-19 and a filthy plant, they could be shipping that around the country.

The attachments in this email include the letter I sent to Secretary Garvin, Attorney General Jennings, and Governor Carney.

I apologize for the dramatic cover and accusatory tone, however, up to this point literally no one in the government from the bottom to the top seemed to care or be able to help. I needed to catch their attention.

I firmly believe what I said about being put at a disadvantage because the State doesn't care to prosecute Mountaire Farms for criminal behavior. Especially since a lot of the illegal activity appears to have taken place on government property. It is bad enough when a corporation pollutes, but that it appears the government was assisting in that is dystopian.

Ex. 6 Personal Privacy (PP) and **Ex. 6 Personal Privacy (PP)** have authorized me to provide their contact information.

Ex. 6 Personal Privacy (PP)

I highly suggest you speak with them as they also witnessed other disturbing behavior and can provide you eyewitness testimony. **Ex. 6 Personal Privacy (PP)** husband **Ex. 6 Personal Privacy (PP)** can also give you eyewitness testimony.

ED_006227_00000078-00003

Specific testimony I find disturbing is that government agents appeared at the active dump next to [REDACTED] home with access to the gate, but only after [REDACTED] called at the same time I sent my email to the state executives. She had already called the EPA once and no one got back to [REDACTED]. I question why they would have had access.

I called the constable about that location. I was told whoever owns it was given written permission to do crush concrete by a man named Lawrence Lank, a previous director of Planning and Zoning. He retired in 2016. I understand this is a State issue and all of this can be parsed out that way, but given the events surrounding that lot I question why he did not simply have them get the necessary special user permit required.

They also can attest to what I was told by both of them separately was "terroristic" use of guns. It wasn't just that they were firing guns. They did it at night and even aimed their target toward the [REDACTED] home.

The police knew it was Tannerite without investigating. Regardless, bombs were exploding.

Both can also attest that bombs were going off as well. Both [REDACTED] described it as sounding like metal canisters exploding. They were called and came out, but they told [REDACTED] it is something called Tannerite which is legal so there is nothing they can do. Perhaps that's true, but I find it hard to believe it's legal to terrorize people with guns and bombs. I suspect the bombs were used to create the pit into which the effluent material flows.

[REDACTED] gave me permission to share your phone number, but I don't see that correspondence written down anywhere, so I don't feel comfortable sharing it. He can provide testimony regarding the airplane flying behind his house spraying foul smelling liquid. His fiancé, [REDACTED] can provide the same.

Between us we can provide you with the following witnesses who have either agreed to come forward or could be subpoenaed if necessary:

- 1) A person who managed the "clean up" department at Mountaire who was given the option of resigning or being fired for "costing Mountaire a lot of money" at the same time all of this occurred.
- 2) The person who worked in management at the plant who said that person was given the option of resigning or being fired. There is reason to believe this person may know the reason why.

ED_006227_00000078-00004

- 3) A person who worked at the plant who knew illegal behavior was going on so they quit because they didn't want to lose their license. This individual now works in upper management at the Selbyville factory in the same department.
- 4) A person who said they saw something called an articulating machine injecting into the ground rather than spraying one of the fields involved in the NOV.
- 5) A person who said they saw county employees regularly entering the Sussex County parcels where dumping was occurring at the same time as that in the northernmost section of settlement Exhibit A.
- 6) My husband is an international expert in meteorology and was recognized by NOAA as the best in the government (i.e. the world). He will not come forward and say he is right and our attorney's scientists are wrong for scientific reasons. But, if compelled to do so he is perfectly qualified to discuss the scientific aspects regarding the very questionable "science" regarding the air area in the settlement map provided in Exhibit A .
- 7) Any number of people who could tell you they smell the chicken plant, but were excluded from the air settlement area as well as people who can attest to the water making them itch.

I also have email communication between myself and my husband to both class counsel and the judge regarding the payment for dropping our objections. I would be shocked to find out that is legal and would like an answer from someone who isn't them as to whether or not it is.

Finally, if there is any way the Federal government can address the horrible dump shown on the cover as quickly as possible I would sincerely appreciate it as would **Ex. 6 Personal Privacy (PP)** I am deeply concerned about their health which is why I purchased the **Ex. 6 Personal Privacy (PP)** (complete strangers) a whole-house water treatment system. All three have suffered very serious medical conditions and the site is still in use several times per week. The trench is on the **Ex. 6 Personal Privacy (PP)** side of the property and I believe it should be dug up as it has been contaminated as well. Unfortunately, there is an enormous landfill that has been placed there which would need to be removed in the process.
