Comments:

May 10,2022, I was supposed to be called on my home phone and I sat here since 5:15 PM and never received a call. How much more of this contaminated water can I take? We have never been offered any drinking or washing water since 2018, I can no longer afford to continue buying gallons of water since my Husband recently Passed Away from Cancer and my 2 dogs, one collapsed in my driveway and had a heart attack (Golden Retriever - Certified Service Dog) and my Yellow Lab had Diabetes and went Blind from too high of Nitrates in the water and had cancerous lumps. I have had several medical problems and sores all over my body. When are they going to do something about peoples and animals lives being destroyed!!!! I have watched my neighbors died in 3 weeks after being diagnosed with cancer and entire family all died within a month. Bottled water was distributed to people West of Mountaire and all around Allen's Poultry in Harbeson DE from day one or had new wells put in, we have not received one drop of water or notification of this situation from the State or DNREC. We have done are own testing since being informed in 2018. An explanation as to why we have been excluded in Indian Summer Village would be greatly appreciated .
