Comments:

Clean Water in the USA is a RIGHT, not a privilege and especially not to be abused and ignored by Mountaineer or any Corporation or Business, or State. Delaware has many Poultry Processing Plants and Farmers which means Delaware should be FAR advanced in the sciences of keeping their citizens safe from the pollution we still see occurring. Failure means sicknesses, diseases and deaths, spanning the unborn, infants, children, adults and seniors. Please PROVE Delaware CARES about Clean Water for ALL by building new and upgrading existing water treatment plants to provide clean water to EVERYONE, now and for it's growing population, and NOT reactionary to CLASS ACTIONS suits covering areas determined by the interests of the guilty polluters, one case at a time.
