Comments:

The citizens of Sussex county must have modern waste facilities that can handle the explosive population growth. The current facility must be fixed immediately and must be proven to work -- not cause pollution as a fall back mechanism. Citizens deserve government officials who are accountable and transparent. There must be consequences when officials lie on the record to give citizens a false sense of security, hiding dangerous broken utilities that cause serious illness and death. And there must be systems that cannot be gamed by Mountaire Farms or anyone else!
