Gentlemen,

Please reconsider your mandate of "only electric cars sold after 2035". It's not realistic and will pose a real monetary hardship on middle class, low income and retired individuals with fixed incomes. Plus it will radically change driving habits - might even take 3 days to get from Delaware to Florida.

Plus a lot of "ingredients" to build electric cars come from China; making us more beholdng to China. NOT GOOD.

While we are to be good stewards of the earth - the Lord put the man in the garden of Eden to dress it and keep it (Gen 2:15) it is the Lord who will end this world. And not even solar panels, wind mills and electric cars will not stay the hand of the Lord.

II Peter 3: 10, 12 tell us:

"the heavens shall pass away with a great noise, and the elements shall melt with fervant heat,

The earth and the work that are therein shall be burned up"

"wherein the heavens being on fire shall be dissolved and the elements shall melt with fervant heat"

Now that's global warming!

I'm a very concerned citizen of Delaware.

Sincerely,

Charlotte Paul
