Comments:

I am not sure anyone looking to pass this mandate has seriously looked into the actual making of the electric vehicle . All of the parts are either harvested or manufactured in China, that's clue 1 we shouldn't do it. What about those who live in apartments , condos, row homes? Where do they install the charging station ? What if they can't afford it? What if they don't have credit or debit cards with the ability to jist pull over and charge? Have you thought about the control that gives China over our lives ? This mandate makes zero sense and does nothing to help our environment .
