Organization: Personal Representative Citizen of the United States of America

Comments:

I am writing to say that I am highly opposed to the Delaware Electric Car Mandate! 1) This Governor Carney Executive Order is a violation of my American Constitutional Right to have fair representation as a citizen by my local House Representative. 2) I find this to be part of the ongoing cancellation of American Rights and Freedom by our federal, state and local governments who are by passing the voice of the people through mandates in order to drive a globalist agenda. 3) This decision should not be made by bureaucrats. We the People deserve fair representation as this will impact our personal well being economically, our ability to freely move around, and a cancellation of a capitalist free market leaving us with a monopolized Globalist economic driven agenda that benefits 1% of the world population. 4) We have the RIGHT to have transportation options that are driven by the free market innovation, development, and supply and demand and not by decisions that are emotionally driven. If this mandate is instituted, I will immediately leave Delaware and will move to a state this is allowing all options for personal transportation. Sincerely, Julie Nay
