Comments:

I would like for you to vote against the mandate about electric cars. This is too much too quick. There are many aspects of electric cars that are not good for the environment. They are very expensive. Delaware cannot handle the power usage to charge them. Creating the batteries and disposal of the batteries are horrible for the environment. Delawareans should have a vote on this and not be forced. Plant more trees and stop all the developing if you want to help CO2 levels. Delaware is far too congested and losing its beauty. People have a right to electric cars, but should not be forced. The technology of electric cars is not advanced enough to make them practical and safe for the environment in mass quantities.
