Dear Hearing Comments

I am writing to urge Delaware to become the first new state to adopt the Advanced Clean Cars II (ACCII) rule – and pave the way for other states to join this important initiative.

Gas-powered cars are contributing to climate change, creating air pollution, and causing heart and respiratory illnesses.

The problems caused by gas-powered cars are big, but adopting ACCII will help Delaware transition to zero-emission vehicles much sooner by requiring all new vehicles sold by manufacturers to be zero-emission by 2035.

The benefits of adopting the ACCII rule are many, including:

- A 50% reduction in planet-warming greenhouse gas emissions from passenger cars by 2040.
- Fewer premature deaths, fewer asthma attacks, and fewer missed days of work due to pollution-related health concerns.
- A lower total cost of car ownership (you won't be held to the wild swings in gas prices!).
- The creation of new jobs manufacturing electric vehicles.

With every passing month, the scientific community's calls for action to curb greenhouse gas emissions are growing more urgent. Delaware's adoption of the ACCII rule will be the exact kind of action we need to clean up one of the dirtiest sources of pollution in the state. This will protect the health of our planet and the health of our people.

Additionally.

Having been hospitalized for 6 days last September due to Flyboy Crop Sprayers 6 minutes of overflights on our properties Friday the 1st I believe (I was too damned mad to mow that Friday so I did it Saturday morning, w/ a mask on, by the time I got done mowing roughly 2 of our acres I was coughing,...and It did not stop until Thursday after being in BayHealth Milford since Tuesday morning). I was released on Sunday the 11th ...

Soo. Maybe you could start by banning aviation fuel that is LEADED. 6 minutes of him over us at 80 foot height , running rich no-doubt dribbled enough lead on us that whatever other crap he was spraying on the fields across 13 to dessicant the soy(they turn yellow 2 days after his visits) maybe was not even necessary to poison my person. Morgan and Morgan Is Calling and I ain't Fooling ...Sir.

Try to kill me again and again is A the Eff OK in DE right ...sir.

And you think pot is a gateway drug.

.Jesus h. And You are Governor.

Regards.

Michael C. MORGAN.

Sincerely,

Michael Morgan
