Priority: High

Dear DNREC:

1. The proposed bans against the sale of EVs in DE would violate this paragraph in the U.S. Constitution, Article 1, Section 8: "The Congress shall have Power ... To regulate Commerce .. among the several States..." Auto sales in the USA clearly constitute Interstate Commerce. Delaware government would be depriving every DE automobile dealer from interstate commerce in new non-EVs, clearly a violation of the U.S. Interstate Commerce clause. If a DE auto dealer will not sell me a non-EV new vehicle after 2035, I will merely go buy a new non-EV vehicle from another state, register it out-of-state, and then re-register it as a used car in Delaware.
2. Humanity's effects on "global warming" are inconsequential compared to natural forces like volcanos and variations in the Earth's orbit around the Sun (Milankovitch cycles). The global warming zealots who push the elimination of fossil fuels, if successful, will lead to the economic destruction of the world economy.
3. The proposed ban is totally TYRANNICAL and a clear violation of the traditional role of free capitalism and the free marketplace in establishing what free citizens wish to purchase.

LAST, AND MOST IMPORTANT, IT WOULD BE A CORNERSTONE OF THE DELAWARE DEMOCRAT PARTY'S ONGOING EFFORTS TO TURN DELAWARE INTO A COMMUNIST STATE, WHICH IS A TYRANNICAL ACT THAT LIKELY CONSTITUTES TREASON AGAINST THE USA AND ITS CONSTITUTION.

Sincerely, Robert Fischer, Lewes, DE
