Comments:

I oppose an EV mandate. As a citizen of the State of Delaware, I believe strongly that I have a right to have my voice heard and not be mandated to drive an elective vehicle that could catch on fire, create a hazard from the poison batteries and cause a financial costs which I can not afford. Risks to Emergency Responders are increased not alone the increased costs for equipment to put out fires from these vehicles. Electric vehicles that create fires on public roadways after result in melting the asphalt roads.
