Dear Delaware Department of Natural Resources and Environmental Control,

Thank you for the opportunity to provide comment in support of the Advanced Clean Clean Cars II (ACCII) rule in Delaware. I support adopting these standards to strengthen the state's tailpipe emission standards and phase out all internal combustion engine vehicle sales by 2035.

Exposure to toxic tailpipe pollution such as NO<sub>x</sub>, Particulate Matter (PM), and Ozone is linked to higher rates of premature death, cancer, heart disease, and breathing problems like asthma in kids and adults.

I am counting on you to protect Delawareans' health and our climate by leading the transition to an all-electric future. Passing a strong ACCII rule will ensure Delaware meets its transportation greenhouse gas reduction targets and improves our state's air quality.

Sincerely,  
Pamela Sheridan
