I don't agree with mandates being handed down by the governor or the heads of government agencies. The potential adoption of ACC II should be voted on by the general public during the 2024 voting cycle in the form of a referendum. Since this regulation would effect ALL Delawareans, it should be put to a vote. The mandate claims to good because it gives vehicle buyers "a choice" to buy an EV. That claim only holds true until 2035 when NO combustion engine vehicles will be allowed to be sold in the state. Where's the choice then?

One or two people should NOT be allowed to decide what is best for the masses. You're not even letting the legislature (our ELECTED representatives) to decide what is best for Delaware.

Delaware should not become another California, look how screwed up that state is.
