Comments:

This country,or state is not ready for EV automobiles. We do not have the infrastructure. This state doesn't even produce enough electricity for every citizen that would be forced to purchase any car or truck. WAWAS and Royal Farm gas stations are not big enough to hold all the vehicles that would need charging. Can't imagine a weekend here in Sussex County with the EV cars waiting for a charge. Lines get long now waiting to just get gas,and that doesn't take as long to charge a car. Where will those that live in condos or apartments charge their car? And just how am I supposed to purchase one of theses, not sure if you have seen the prices,we can't afford most of them and at 6 ft 2 ,I can't fit in a small EV little own afford one. Let us ,the citizens of Delaware choose our vehicles. Not the non elected officials.
