To: HearingComments, DNREC (MailBox Resources)

I do not support the EV mandate that is to be regulated by DNREC.

One, it is unconstitutional for the legislature to delegate the authority of law making that is VESTED in the legislature. Article 2 Section 1: *The legislative power of this state shall be **vested** in a general assembly, which shall consist of a Senate and House of representatives.*

Two, Delaware air has never been cleaner and Delaware is already fully compliant with Environmental Protection Agency standards.

Three, many of our citizens are on fixed incomes, are just starting their families and careers, and some are small business owners, who cannot afford the high-ticket price of EV's and this cost should not be redistributed to other Delaware taxpayers.

Four, there are other options for clean vehicular emissions, such as hydrogen fuel cells.

Five, living in Sussex County, we are vulnerable to evacuation orders and would be stranded if EV's were mandated.

I urge you to reconsider the electric vehicle mandate, it will cost me
my ability to afford transportation
my freedom to travel with my family
my freedom to travel when and where I choose
my life during an emergency

I look forward to hearing from you.
