Organization: No

Comments:

This proposal is flawed just for starters who will be paying for upgrading the feeders transformers in ever neighborhood to carry the extra load? No one has the money to spend on a new car in this Biden economy. This again is a agenda to cost the taxpayers money period don't tell us about global warming it's a imagery narrative but your stealing from the public. That's why if passed moving to Florida were they care about the people. Look how much pollution co2 it takes to make a electric car.
