Comments:

I am writing again to OPPOSE the mandate to transition to EV's from 2025 to 2035. DENREC does not have the authority, even delegated by the governor, to issue or enforce a state mandate on the citizens, businesses and communities of Delaware. The mandate contradicts equal opportunity for the citizens of Delaware. The infrastructure is ill prepared to accommodate the timeline required by the regulations. The market is moving steadily toward decreasing emissions. However climate science, state and national economies, industry and manufacturing do not support the austerity of these regulations. Finally, the regulations DISPROPORTIONATELY strain the welfare, functional lifestyle and productivity of lower economic and high intensity residential areas in cities and apartment dwellers. DO NOT IMPOSE these regulations on Delaware citizens.
