Comments:

I will leave this state if this nonsense ever becomes law. Electric comes from coal fired power plants which emit more CO2 than gasoline. Few can afford EVs without massive govt subsidies that add to our unsustainable debt. Get out of people's lives. Let them choose the car they want. The market place decides. Except in 3rd World Banana 🍌 Republics. The notion that man is causing the planet to warm to the point of climate catastrophe is absurd. There is no credible evidence whatsoever for such nonsense. This is nothing but a political power grab and you will destroy Delaware with this type of high handed thuggery.
