Email Address: Fac.recte.et.nil.time@gmail.com

Organization: Myself

Comments:

I am a marginalized citizen. I am disabled. I am on a fixed income. Your low emission vehicle program will make me housebound. I will never be able to afford a car again. I am unable to use public transportation because it doesn't come to where I live and I couldn't get into it if it did. I use a walker, but they will not let me use the lift because I am not in a wheel chair. Now you want to take away my right to travel. Take away my right to be self reliant. I cannot afford an electric car. I cannot afford to replace the battery every 10 years. And the poor children in Africa who are slaves in the mines so china has what it needs to make the batteries??? When did Delaware decide slavery was ok? Also, the disposal of the batteries is in no way good for the environment. You are literally trading one pollutant for another. This policy is not sound. It is detrimental to the environment. It is discriminatory.
