Comments:

This type of decision for our state needs to be voted on by my representative, not by executive order of the governor. I am concerned with the safety of electric vehicles, the drain on our power grid for charging the vehicles, the wear and tear on our state's roads and bridges and the cost of these vehicles which will be unaffordable for many of our citizens. Since the majority of the vehicles purchased in our state are used, I am concerned that a used electric vehicle will be out of the question due to the life of the battery. We need to let the market determine this program, not California.
