Hello,

I support the goal of 100% zero emission vehicles by 2035. We must manage emissions to maintain the viability of all people on our planet. Fourteen other states are moving in this direction and we must join them. Thank you for your attention to this important matter.

“We don't receive wisdom; we must discover it for ourselves after a journey that no one can take for us or spare us.”
Marcel Proust, French author

“The ideal subject of totalitarian rule is not the convinced Nazi or the dedicated communist, but people for whom the distinction between fact and fiction, true and false, no longer exists.”
Hannah Arendt
