Comments:

This topic came up in conversation at a women's group luncheon that I recently attended. Virtually everyone was against being FORCED to drive an electric car. Our infrastructure is not adequate, and the technology is not advanced enough at this time. And....how is it that we are supposed to follow California's lead? That state is a mess! They are the LAST state we should copying! I am adamantly opposed to being forced into this mandate. The Sussex County town hall that was held on this topic was standing room only, so I'm obviously not the only one.
