Comments:

As a Delaware resident, I fully support implementing an aggressive timeline for requiring sale of electric vehicles in this state. Climate change is upon us with severe storms, sea level rise and more negative impacts. Our country and state MUST take concrete actions toward meeting the carbon reduction goals by 2035 or suffer even more severe consequences. Once there are legal requirements for the sale of electric vehicles, the auto manufacturers will respond with more affordable models and the public will respond by buying and driving electric vehicles.
