Comments:

EV motors ae a grand idea but let's confirm the Nation's Electric Grid will support it. My Electrician spouse has confided in me at the present time the US Electric Grid will not be able to provide enough power. It took time to develop the combustibile engine do you really believe it can be done during a 4 year presidential term? And I haven't heard the Secret Service promoting or announcing any EV vehicles. And \$10,000.00 government support or not .... we common, tax payers can not afford an EV. so Once your ban goes into effect look for more of we common folk, TAXPAYERS, waiting at the bus stops.
