Comments:

To the Honorable Governor John Carney and Secretary Garvin, I do not support this mandate. Tee Governor and DNREC do not have the authority to make any mandates on the people living in the state or companies supplying or manufacturing products in this state. This subject should be driven by the market place. There are more pressing issues in our state than worrying about a "problem" that I consider secondary to the groundwater pollution and forever chemicals in our soil and groundwater. The state is not prepared for the infrastructure needed to support EV's at this time and into the foreseeable future .The Democrat's apparent reliance on solar and wind power to meet our energy needs is biased and shortsighted. Countries have tried and found that their energy needs cannot be met unless fossil and nuclear power are used in conjunction. I therefore repeat that the Governor and DNREC do not have the authority to issue and implement this mandate. Leave the decision up to the people. Glenn Gunter Hockessin
