Comments:

I am against this low emissions bill that mandates gas powered vehicles cannot be sold after 2030. It is unconstitutional to tell people what they can make or drive. Electric vehicles are impractical. Our outdated electric grid cannot support charging tens of thousands cars every day. Let the free market decide on what kind of cars and trucks people will buy and manufacturers will make cars accordingly. The batteries for these electric cars are made in China and expensive. Vote against 2022-R-A-0011.
