Comments:

Please stop creating problems for our State. \*We have no plan for the extra burden on the electrical infrastructure. \* You don't know how this will shut down jobs and small businesses. You also don't have a plan to replace said jobs. \* If we reduce the gasoline powered vehicles how are we going to replace the fuel tax for the highways? They will still be driven on and needed to be repaired. \* We also don't have a plan for the emergency response departments all over the state to extract people from the electric cars safely. The plan needs to be a longer amount of time and we need to CREATE a plan to make this transition SUCCESS!! This implementation is reckless.
