Comments:

I am writing to oppose the low emissions vehicle program. I am opposed to this mandate as it causes severe financial hardship, this is a government driven, short sighted mandate that harms Delawareans. The United States of America in studies, has proven to be one of the least polluting nations, yet your heavy handed regulations are penalizing Delawareans while China, the largest polluter in the world has nothing done to improve climate policies. Lastly with only 3% of vehicles being electric, California recently had to inform persons to not charge their vehicles in high air conditioning periods, what will happen when it is 100% in Delaware. You're turning this state into a third world country. This is an authoritarian, short sighted, mandate which detrimentally affects Delawareans.
