Comments:

As a teenager and upcoming driver to Delaware and the united states. And a 2026 graduate im opposed to the clean car legislation act. These cars are fire hazards, epensive to buy, expensive to replace parts and time expensive when it comes to charging. As someone who travels 300-600 miles frequently to see out of state family this would add 2+ hours to an already 5+ hour drive. The technology for these cars is just not yet far enough advaced for this legislation to be applied right now. Also it would negatively impact me starting my own life here in delaware so i would be have to start somewhere else intsead of having a security net if somthing were to happen.
